

- ✓ Efficiency
- ✓ Security
- ✓ Accuracy
- ✓ Compliance

**D-BIT Robotic Process Automation** improves business efficiency, data security, accuracy and compliance, by automating repetitive tasks.

#### KEY FEATURES

- Designed to optimize processes that are **repetitive, rule-based, and liable to human error.**

- Simultaneously improve the speed, consistency and quality of service in payroll while **driving down the total cost of delivery.**

- Employ 'software agents' to carry out **multi-step labour intensive processes.**

- Manage multiple (including remote) payroll servers and instances from a **master browser console.**

- **Publish formatted report packs** to the D-BIT payroll client self-service portal.
